

Dear Ladies and Gentlemen,I enjoy my XM radio very much and the service it provides. I make frequent trips from Wichita Falls, TX to Irving, TX to visit my mother. The addition of the MetroPlex traffic and weather has helped save me time and money in getting through the sometimes endless traffic. The local radio stations in the MetroPlex do not provide accurate up to date information to help me weed my way through traffic. I also think is is time for the government to look at more important items. I also do not think it is right that if a business feels threatened that they can lobby to have something stopped to benefit them. If they want a bigger part of the market then put out a better product.

Thank you for you time and for listening to me.

Glen Eickman
